

venient axle alignment and cast beam trailing arm construction for optimal strength and weight reduction.

In addition, the new SAF-Holland 5-3/4-inch diameter X Series Axle, drum brake configurations and optional Integral-Disc brake technology provides a new level of technology and choice for today's trailer purchaser.

The Integral-Disc option improves braking performance and efficiency while lowering maintenance costs and downtime, the company said. A proprietary Bi-Metallic casting process mechanically combines the rotor and adapter-flange into a single rotor assembly. The Integral's Bi-Metallic rotor assembly is designed to control the effects of heat. Unlike conventional disc brake technology, that often experiences uncontrolled deformation and hot spots, Integral's rotor expands in a radial direction, under extreme braking conditions, to keep rotor surfaces flat and stable. This helps to minimize the risk of premature rotor failure, while extending brake pad and bearing life.

STEMCO DUROLINE SHOE, BRAKE HARDWARE KITS

Stemco Duroline rolled out shoe kits and brake hardware kits, which are available with the company's high performance friction material with "Wave Process" technology.

Last fall, Stemco Duroline announced the launch of its high performance friction material, which provides better stopping, longer life, reduced noise and reduced drum wear, Stemco says.

STEMCO
DUROLINE
an EnPro Industries company

According to Stemco Duroline, new brake shoes offer several benefits over re-using cores, including providing an excellent foundation for brake balance and the correct tolerances for consistent tables, cams and anchor tolerances. In addition, new brake shoes eliminate the costs of dealing with cores.

VALVOLINE, TIWI FUEL PROOF GUARANTEE PROGRAM

Valvoline and tiwi launched a joint initiative to provide customers with a Fuel Proof Guarantee to test fuel economy improvements. Under the program, fleet operators with a minimum of 30 trucks will have 120 days to test Valvoline's Premium Blue Extreme engine oil and Syn Gard FE gear oil. The tiwi onboard system will be used to establish baseline data.

In addition, the tiwi verbal-coaching system is activated to provide drivers with real-time verbal mentoring about speeding violations, aggressive driving, other inefficient habits, seat belt use and more.

If the fleet does not experience an increase in

fuel economy, the two companies will remove their products from the vehicles and reimburse the fleet for any incremental costs.

Sponsored by
VOLVO TRUCKS NORTH AMERICA

Aaron Tippin and Dave Nemo headline the Back On The Road 2010 event at the Mid-America Trucking Show!

Be sure to join country music star, Aaron Tippin and Sirius XM radio personality, Dave Nemo as Arrow Truck Sales, Volvo Trucks North America and other industry leading sponsors announce the **Back On The Road 2010 contest winner** - live on stage - at the Mid America Trucking Show in Louisville! The event will take place **Friday, March 26 at 11:00 a.m.** at the Arrow Truck Sales Booth. Be part of the excitement as we help another deserving trucker get Back On The Road!
